NPSF Discussion Forum (ListServ)

Patientsafety-L is a moderated listserv (online discussion forum using E-mail) devoted to thoughtful conversation toward the development of a safer health care system. The National Patient Safety Foundation Listserv members offer an amazing plethora of experience and background. Individuals, including patients and families, researchers, providers, administrators and those in the boardroom, make up our listserv community. It is our hope that members will continue to raise important questions, address critical issues, and tackle significant problems related to patient safety. We appreciate your continued involvement in this discussion board.
